

CHUCK E. CHEESE & SHOWBIZ PIZZA PLACE TOKEN CATALOG - 416 tokens (total) confirmed

CATALOG NOTES:

1. Token size (diameter) is given in millimeters. All tokens listed are solid, round, and with a plain edge.
2. Tokens thought to be the result of manufacturing error (i.e. unplated zinc tokens, off-center strikes, clipped planchets, etc.), as well as prototype/pattern pieces not put into full production, are not listed.
3. "" = exact wording found on token, () = image found on token, {} = identifying information not found on token, [] = color of plastic or anodized token.
4. Catalog numbers containing L, M, or N as the second letter of the 3-digit code were created by the author.
5. Since tokens of different compositions have been grouped under one catalog number, each token has that catalog number followed by its composition in parentheses. For example, a 1977 gilt brass token would have a catalog number of CA 910 PIZ (gB).
6. Anything highlighted in yellow is guessed to exist, or is unknown to which variety it belongs. Please notify Joe Lewis if you can confirm.

COMPOSITION ABBREVIATIONS:

B = Brass
BZ = Bronze
N = Nickle Plated
C = Copper Plated
W = Wood
P = Plastic
A = Aluminum
g = Gilt (used as a prefix)
a = Anodized (used as a prefix)
b = Black Chromate (used as a prefix)
